CAPITAL MANAGEMENT

Capital Management aims to safeguard Group's ability to continue as a going concern so that it could continue to provide adequate returns to the shareholders by pricing products and services commensurately with the level of risk. For this the Group ensures strong capital position and efficient use of capital as determined by the underlying business strategy i.e. maximizing growth on continuing basis. The Group maintains a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Group recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position.

This process is managed by the Asset Liability Committee (ALCO) of the Group. The objective of ALCO is to derive the most appropriate strategy in terms of the mix of assets and liabilities given its expectations of the future and the potential consequences of interest rate movement, liquidity constraints and capital adequacy and its implication on risk management policies.

The Group prepares Annual Budget and Projections outlining its future growth and direction keeping in consideration the economic and political factors in the country and region. Adequacy of capital to support the expected growth in balance sheet is also ascertained.

Stress testing of the Group is regularly performed to ensure that the Group remains well capitalised and able to sustain any shocks under any of the specified risk factors.

The State Bank of Pakistan (SBP) introduced guidelines with respect to disclosure of capital adequacy related information in the financial statements of Groups vide its communication dated February 4, 2014. These guidelines are based on the requirements of Basel III which were introduced by the SBP in August 2013 for implementation by the Groups in Pakistan. The SBP has specified a transitional period till 2018 for implementation of Basel III. The SBP vide its BPRD Circular No. 11 of 2014 dated November 5, 2014 has specified the disclosure requirements with respect to capital adequacy related information. The disclosures below have been prepared on the basis of the SBP's circular.

Goals of managing capital

The goals of managing capital of the Group are as follows:

- To be an appropriately capitalised institution, considering the requirements set by the regulators of the Grouping markets where the Group operates;
- Maintain strong ratings and to protect the Group against unexpected events; and
- Availability of adequate capital at a reasonable cost so as to enable the Group to operate adequately and provide reasonable value addition for the shareholders.

Capital Structure

Under Basel III framework, Group's regulatory capital has been analysed into two tiers as follows:

- Tier 1 capital (going concern capital) which is sub divided into:

(a) Common Equity Tier 1 (CET1), which includes fully paid up capital, reserve for bonus issue, general reserves and un-appropriated profits (net of losses), etc. after deductions for investments in the equity of subsidiary companies engaged in Grouping and financial activities (to the extent of 50% after incorporating transitional provisions), reciprocal crossholdings and deficit on revaluation of available for sale investments and deduction for book value of intangibles.

The State Bank of Pakistan vide its letter no BPRD/BA&CP/649/3634/2019 dated February 15, 2019 has advised the Bank to apply regulatory deductions with respect to the balance sheet amount of "Goodwill" and "Deferred Tax Assets" pertaining to Defunct KASB Bank in the year ending 31 December 2019, 31 December 2020, 31 December 2021 at the cumulative rate of 25%, 60% and 100% respectively. Accordingly, the amounts of goodwill and deferred tax asset pertaining to defunct KASB Bank Limited have been deducted at the rate of 25% from CET 1 capital as at 31 December 2019.

(b) Additional Tier 1 capital (AT1), which includes instruments issued by the Group which meet the specified criteria after regulatory deduction for investments in the equity of subsidiary companies engaged in Grouping and financial activities and other specified deductions.

State Bank of Pakistan vide its letter no. BPRD/BA&CP/649/3760/20 dated February 24, 2020 has allowed the Bank to consider funds received against Pre-IPO of ADT-1 sukuk as ADT-1 sukuk for the purpose of calculation of capital adequacy ratio. (Subject to conditions as disclosed in note 20 to the unconsolidated financial statements)

- Tier II capital, which includes general provisions for loan losses (upto a maximum of 1.25% of credit risk weighted assets), reserves on revaluation of fixed assets after deduction of deficit on available for sale investments (upto a maximum of 78%), and any balance specifically allowed by the regulator.

Group operations are categorised in either the trading book or the Banking book and risk weighted assets are determined according to the specified requirements that seek to reflect the varying levels of risk attached to assets and off balance sheet exposures.

Capital adequacy ratio

The capital to risk weighted assets ratio, calculated in accordance with the SBP guidelines on capital adequacy, under Basel III and Pre-Basel III treatment using Standardised Approach for Credit and Market Risk and Basic Indicator Approach for Operational Risk is presented below:

Particulars	2019	2018
	Amount	
	---------- Rupees in '000 ----------	
Common Equity Tier 1 capital (CET1): Instruments and reserves		
Fully paid-up capital / capital deposited with the SBP	11,087,033	10,079,121
Balance in share premium account	-	-
Reserve for issue of bonus shares	-	-
Discount on issue of shares	(79,042)	(79,042)
General / Statutory Reserves	1,187,624	968,685
Gains / (Losses) on derivatives held as Cash Flow Hedge	-	-
(Accumulated loss) / Unappropriated profits	3,436,341	2,236,825
Minority Interests arising from CET1 capital instruments issued to third party by consolidated Bank subsidiaries (amount allowed in CET1 capital of the consolidation group)	39,608	32,499
CET 1 before Regulatory Adjustments	15,671,564	13,238,088
Total regulatory adjustments applied to CET1	(1,580,830)	(673,248)
Common Equity Tier 1	14,090,734	12,564,840
Additional Tier 1 (AT 1) Capital		
Qualifying Additional Tier-1 capital instruments plus any related share premium of which:	-	-
- classified as equity	-	-
- classified as liabilities	1,700,000	-
Additional Tier-1 capital instruments issued by consolidated subsidiaries and held by third	-	-
- of which: instrument issued by subsidiaries subject to phase out	6,990	5,734
AT1 before regulatory adjustments	1,706,990	5,734
Total of Regulatory Adjustment applied to AT1 capital	-	-
Additional Tier 1 capital after regulatory adjustments	1,706,990	5,734
Tier 1 Capital (CET1 + admissible AT1)	15,797,724	12,570,574

Tier 2 Capital		
Qualifying Tier 2 capital instruments under Basel III plus any related share premium *	3,086,794	2,822,857
Capital instruments subject to phase out arrangement issued	-	-
Tier 2 capital instruments issued to third parties by consolidated subsidiaries		
- of which: instruments issued by subsidiaries subject to phase out	11,649	9,558
General Provisions or general reserves for loan losses-up to maximum of 1.25% of Credit Risk Weighted Assets	337,812	230,642
Revaluation Reserves (net of taxes)		
of which:		
- Revaluation reserves on fixed assets	1,448,616	1,479,516
- Unrealized gains/losses on AFS	2,993,302	34,836
Foreign Exchange Translation Reserves	-	-
Undisclosed/Other Reserves (if any)	-	-
T2 before regulatory adjustments	7,878,173	4,577,409
Total regulatory adjustment applied to T2 capital	-	
Tier 2 capital (T2) after regulatory adjustments	7,878,173	4,577,409
Tier 2 capital recognized for capital adequacy	4,453,551	4,342,930
Portion of Additional Tier 1 capital recognized in Tier 2 capital	-	-
Total Tier 2 capital admissible for capital adequacy	4,453,551	4,342,930
TOTAL CAPITAL (T1 + admissible T2)	20,251,275	16,913,504
Total Risk Weighted Assets (RWA) {for details refer Note }	136,088,501	112,726,748

* Considered as Tier II capital as per the SBP's approval vide letter no BPRD(R&P-02)/625-112/2017/4809 dated February 24, 2017.

Particulars	2019	2018
	Amount	
	---------- Rupees in '000 ----------	
Capital Ratios and buffers (in percentage of risk weighted assets)		
CET1 to total RWA	10.35%	11.15%
Tier-1 capital to total RWA	11.61%	11.15%
Total capital to total RWA	14.88%	15.00%
Group specific buffer requirement (minimum CET1 requirement plus capital conservation buffer plus any other buffer requirement) of which:	-	-
- capital conservation buffer requirement	-	-
- countercyclical buffer requirement	-	-
- D-SIB or G-SIB buffer requirement	-	-
CET1 available to meet buffers (as a percentage of risk weighted assets)	4.35%	5.15%
National minimum capital requirements prescribed by SBP		
CET1 minimum ratio	6.00%	6.00%
Tier 1 minimum ratio	7.50%	7.50%
Total capital minimum ratio	10.00%	10.00%
CCB (Consisting of CET 1 only)	2.50%	1.90%
Total Capital plus CCB	12.50%	11.90%

Particulars	2019 Amount	2018 Amount
	----- Rupees in '000 ----	
Common Equity Tier 1 capital: Regulatory adjustments		
Goodwill (net of related deferred tax liability)	-	-
All other intangibles (net of any associated deferred tax liability)	532,041	182,384
Shortfall of provisions against classified assets	157,506	490,864
Deferred tax assets that rely on future profitability excluding those	891,283	
arising from temporary differences (net of related tax liability)	-	-
Defined-benefit pension fund net assets	-	-

Capital shortfall of regulated subsidiaries	-	-
Deficit on account of revaluation from Group's holdings of property / AFS	-	-
Investments in the capital instruments of Grouping, financial and insurance entities that are outside the scope of regulatory consolidation, where the Group does not own more than 10% of the issued share capital (amount above 10% threshold)	-	-
Significant investments in the common stocks of Grouping, financial and insurance entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
Deferred Tax Assets arising from temporary differences (amount above 10% threshold, net of related tax liability)	-	-
Amount exceeding 15% threshold of which:	-	-
- significant investments in the common stocks of financial entities	-	-
- deferred tax assets arising from temporary differences	-	-
National specific regulatory adjustments applied to CET1 capital	-	-
Investment in TFCs of other Groups exceeding the prescribed limit	-	-
Any other deduction specified by SBP	-	-
Regulatory adjustment applied to CET1 due to insufficient AT1 and Tier 2 to cover deductions	-	
Total regulatory adjustments applied to CET1	1,580,830	673,248
Additional Tier 1 Capital: regulatory adjustments		
Investment in mutual funds exceeding the prescribed limit (SBP specific adjustment)	-	-
Investment in own AT1 capital instruments	-	-
Reciprocal cross holdings in Additional Tier 1 capital instruments	-	-
Investments in the capital instruments of Grouping, financial and insurance entities that are outside the scope of regulatory consolidation, where the Group does not own more than 10% of the issued share capital (amount above 10% threshold)	-	-
Significant investments in the capital instruments issued by Grouping, financial and insurance entities that are outside the scope of regulatory consolidation	-	-
Portion of deduction applied 50:50 to core capital and supplementary capital based on pre-Basel III treatment which, during transitional period, remain subject to deduction from tier-1 capital	-	-
Regulatory adjustments applied to Additional Tier 1 due to insufficient Tier 2 to cover deductions	-	-
Total of Regulatory Adjustment applied to AT1 capital	-	-

* This column highlights items that are still subject to Pre Basel III treatment during the transitional period

Tier 2 Capital: regulatory adjustments

Portion of deduction applied 50:50 to core capital and supplementary capital based on pre-Basel III treatment which, during transitional period, remain subject to deduction from tier-2 capital	-	-	-
Reciprocal cross holdings in Tier 2 instruments	-	-	-
Investment in own Tier 2 capital instrument	-	-	-
Investments in the capital instruments of Grouping, financial and insurance entities that are outside the scope of regulatory consolidation, where the Group does not own more than 10% of the issued share capital (amount above 10% threshold)	-	-	-
Significant investments in the capital instruments issued by Grouping, financial and insurance entities that are outside the scope of regulatory consolidation	-	-	-
Amount of Regulatory Adjustment applied to T2 capital	**-**	**-**	**-**

	2019	2018
Risk Weighted Assets subject to pre-Basel III treatment	---------- Rupees in '000 ----------	
Risk weighted assets in respect of deduction items (which during the transitional period will be risk weighted subject to Pre-Basel III Treatment)	-	-
of which: deferred tax assets	-	-
of which: Defined-benefit pension fund net assets	-	-
of which: Recognized portion of investment in capital of Grouping, financial and insurance entities where holding is less than 10% of the issued common share capital of the entity	-	-
of which: Recognized portion of investment in capital of Grouping, financial and insurance entities where holding is more than 10% of the issued common share capital of the entity	-	-
Amounts below the thresholds for deduction (before risk weighting)		
Non-significant investments in the capital of other financial entities	-	-
Significant investments in the common stock of financial entities	-	-
Deferred tax assets arising from temporary differences (net of related tax liability)	500,409	175,330
Applicable caps on the inclusion of provisions in Tier 2		
Provisions eligible for inclusion in Tier 2 in respect of exposures subject to standardized approach (prior to application of cap)	337,812	230,642
Cap on inclusion of provisions in Tier 2 under standardized approach	1,494,143	1,240,441
Provisions eligible for inclusion in Tier 2 in respect of exposures subject to internal ratings-based approach (prior to application of cap)	-	-
Cap for inclusion of provisions in Tier 2 under internal ratings-based approach	-	-

Leverage ratio

According to Basel III instructions issued by State Bank of Pakistan (BPRD circular # 06, dated: August 15, 2013), it is mandatory for all the banks to calculate and report the Leverage Ratio on a quarterly basis with the minimum

The reason for calculating leverage ratio is to avoid excessive On- and Off-balance sheet leverage in the banking system. A simple, transparent and non-risk based Ratio has been introduced with the following objectives:

- Constrain the build-up of leverage in the banking sector which can damage the broader financial system and the economy; and

- Reinforce the risk based requirements with an easy to understand and a non-risk based measure.

	Particulars	**2019**	**2018**
		--------------- Rupees in '000 ---------------	
	On balance sheet exposures		
1	On-balance sheet items (excluding unrealised gain on forward contracts)	284,363,096	216,650,884
2	Forward exchange commitments with positive fair values	110,296	306,233
	Total on balance sheet exposures	**284,473,392**	**216,957,117**
	Off balance sheet exposures		
3	Off-balance sheet items	29,018,574	14,899,885
4	Commitment in respect of forward exchange contracts	112,598	27,142
	Total Off balance sheet exposures	**29,131,172**	**14,927,027**
	Capital and total exposures		
5	**Tier 1 capital**	**15,797,724**	**12,570,574**
6	**Total exposures**	**313,604,564**	**231,884,144**
Basel III leverage ratio		**5.04%**	**5.42%**

The current year's leverage ratio is 5.04% (2018: 5.42%) whereas total tier 1 capital and total exposures are Rs. 15,797.724 million (2018: Rs. 12,570.574 million) and Rs. 313,604.564 million (2018: Rs. 231,884.144 million) respectively.

Capital Structure Reconciliation

Reconciliation of each financial statement line item to item under regulatory scope of reporting - Step 1

Particulars		Balance sheet as in published financial statements	Under regulatory scope of reporting
		----------------(Rupees in '000)-------------	
Assets			
Cash and balances with treasury banks		14,640,163	14,640,163

The Group obtains capital relief for both on and off-balance sheet non-market related exposures by using simple approach for Credit risk mitigation (CRM). Off-balance sheet items under the simplified standardized approach are converted into credit exposure equivalents through the use of credit conversion factors. Under the standardized approach the Group has taken advantage of the cash collaterals available with the Group in the form of security deposits and cash margins.

Valuation and management of eligible collaterals for CRM is being done in line with the conditions laid down by the SBP. Since eligible collaterals for CRM purposes are all in the form of cash collaterals, they generally do not pose risk to the Group in terms of change in their valuation due to changes in the market conditions.

Liquidity Risk

Liquidity risk is the potential loss to the Group arising from its inability either to meet its obligations (financial) or to fund increases in assets as they fall due without incurring unacceptable costs or losses.

BIPL's liquidity at various levels (day to day, short term, long term) is managed by the Treasury along with the Asset and Liability Management Committee (ALCO), which is one of the most important management level committees. Its role cannot be overemphasized here, it serves as a part of the critical trio with risk management and treasury department, monitoring and maintaining key liquidity ratios, a viable funding mix, depositor concentration, reviewing contingency plans etc.

Liquidity risk is defined as the potential loss arising from the Bank's inability to meet in an orderly way its contractual obligations when due. Liquidity risk arises in the general funding of the Bank's activities and in the management of its assets. The Bank maintains sufficient liquidity to fund its day-to-day operations, meet customer deposit withdrawals either on demand or at contractual maturity, meet customers' demand for new financings, participate in new investments when opportunities arise, and to meet any other commitments. Hence, liquidity is managed to meet known as well as unanticipated cash funding needs.

Bank calculates the Liquidity Coverage Ratio (LCR) on monthly basis as per SBP Basel III Liquidity Standards issued under BPRD circular no 08 dated June 23, 2016. The objective of LCR is to ensure the short-term resilience of the liquidity risk profile of Bank which requires banks to maintain sufficient High Quality Liquid Assets (HQLAs) to meet stressed cash outflows over a prospective 30 calendar-days period. As of December 31, 2018, Bank's LCR stood at 191.92% against the SBP's minimum requirement of 100%.

The objective of Net Stable Funding Ratio (NSFR) is to reduce funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress. Banks are expected to meet the NSFR requirement of at least 100% on an ongoing basis from December 31, 2018.

Governance of Liquidity risk management

Liquidity and related risks are managed through standardized processes established in the Bank. Board and senior management are apprised about liquidity profile of the Bank on periodic basis so as to ensure proactive liquidity management and to avoid abrupt shocks. The management of liquidity risk within the Bank is undertaken within limits and other policy parameters set by ALCO, which meets monthly and reviews compliance with policy parameters. Day to day monitoring is done by the treasury while overall compliance is monitored and coordinated by the ALCO and includes reviewing the actual and planned strategic growth of the business and its impact on the statement of financial position and monitoring the Bank's liquidity profile and associated activities. Bank's treasury function has the primary responsibility for assessing, monitoring and managing bank's liquidity and funding strategy. Treasury Middle Office being part of Risk management group is responsible for the independent identification, monitoring & analysis of risks inherent in treasury operations. The bank has in place duly approved Treasury investment policy and strategy along with liquidity risk tolerance/appetite levels. These are communicated at various levels so as to ensure effective liquidity management for the Bank.

Funding Strategy

Bank's prime source of liquidity is the customer's deposit base. Within deposits, Bank strives to maintain a healthy core deposit base in form of current and saving deposits and avoid concentration in particular products, tenors and dependence on large fund providers. Further, Bank relies on Interbank borrowing for stop gap funding arrangements but same is less preferred source of liquidity. Within borrowing, sources of funding are also diversified to minimize concentration. Usually Interbank borrowing is for short term. The bank follows centralized funding strategy so as to ensure achievement of strategic and business objectives of the Bank.

Liquidity Risk Mitigation techniques

Various tools and techniques are used to measure and monitor the possible liquidity risk. These include monitoring of different liquidity ratios like cash to deposits, financing to deposit ratio, liquid assets to total deposits, Interbank borrowing to total deposits and large deposits to total deposits which are monitored on daily basis against different triggers levels and communicated to senior management and to ALCO forum regularly. Further, Bank also prepares the maturity profile of assets and liabilities to monitor the liquidity gaps over different time buckets. For maturity analysis, behavioral study techniques are also used to determine the behavior of non-contractual assets and liabilities based on historic data and statistical techniques. The Bank also ensures to maintain statutory cash and liquidity requirements all times.

Liquidity Stress Testing

As per SBP BSD Circular No. 1 of 2012, Liquidity stress testing is being conducted under various stress scenarios. Shocks include the withdrawals of deposits and increase in assets, withdrawals of wholesale/large deposits & interbank borrowing and utilization of undrawn credit lines etc. Results of same are escalated at the senior level so as to enable the senior management to take proactive actions to avoid liquidity crunch for the Bank.

Contingency Funding Plan

Contingency Funding Plan (CFP) is a part of liquidity management framework of the bank which identifies the trigger events that could cause a liquidity crisis and describes the actions to be taken to manage the crisis. At Bank, a comprehensive liquidity contingency funding plan is prepared which highlights liquidity management chain that needs to be followed. Responsibilities and crisis management phases are also incorporated in order to tackle the liquidity crisis. Moreover, CFP highlights possible funding sources, in case of a liquidity crisis.

Main drivers of LCR Results

Main drivers of LCR Results are High Quality Liquid Assets and Net cash outflows. Outflows are mainly deposit outflows net of cash inflows which consist of inflows from financing and money market placements up to 1 month. The inputs for calculation of LCR are as prescribed by the regulator.

Composition of High Quality Liquid Assets - HQLA

High Quality Liquid Assets composed of Level-1 Assets which can be included in the stock of liquid assets at 100% of their market value. Bank has taken Cash & treasury balances, Investments in GoP Ijarah Sukuks classified as Available for Sale category and foreign currency placements issued by sovereigns. Further, Level 2-A asset category includes investment in corporate sukuk.

Concentration of Funding Sources

Being a commercial bank, it relies on funds provided by depositors. However the Bank has been continuously improving upon its ratio of core deposits. Current and Saving accounts consist of 59.71% of total deposits, term deposits are 40.29% and borrowing from SBP and financial institutions is 6.60% of total deposits. Moreover the Bank does not rely on top few depositors to meet its funding requirements. This clearly shows that the funding sources for the Bank are well diversified.

Currency Mismatch in the LCR

Currency mismatch is minimal as FCY deposits are 3.14% of Bank's total deposits.

Liquidity Coverage Ratio (LCR) - As at December 31, 2019

(in local currency)	TOTAL UNWEIGHTED VALUE (average)	TOTAL WEIGHTED VALUE (average)
